Overview

Attached is an overview document that shows what is possible within the offerings of the Quantum Alignment Services/Biofeedback system and is intended to give you a better sense of what we have created and what else is possible.

1. **Core Services** - Our Current core Services offered daily (automatically) for those that subscribe. This service has been designed to deliver automatically each and every day. The components of the core service are set out in this document so you can get a sense of what that means.
2. **On Demand Services** - One can then add the on-demand zap options include XOS, Allergy, Aura, Pain, Sleep, and Stress in addition to the core services if they choose. The current on-demand features are outlined in this document so get a sense of the features of the SCIOS that are included with those packages.
3. **Customization possibilities...** We have attached what else is possible now that we have completed the current automation phase of the systems. As you can see from the robust list in the attached document there are many possibilities. Where this part goes we are unsure but leave it up to you in your own curiosity to see what is possible for you.
