**Future medicine will be the
medicine of frequencies.**

-- Albert Einstein

About the Frequency Medicine Group

The Group consists of more than a dozen companies and contractors **located across the world.**

The heart of the Group centres around the Frequency Medicine Institute, a **non-profit charity** registered in England & Wales under Companies House Number 11486072.

Founded in 2018, it has grown through the recent pandemic thanks to 100% self-funded efforts. It specialises in bespoke telehealthcare solutions providing frequency medicine equipment for purchase or hire, certified training and education on the use of such equipment, and the sponsorship and investigation of **two clinical trials to date.**

Vision & Mission

Vision

Our vision is to enable accessible, comprehensive healthcare for every person in the world.

Accessible means:

- affordable
- understandable
- easy-to-use
- quickly obtainable

Mission

Our mission is to pioneer advancements in the field of non-invasive frequency medicine.

The Current (Dire) Situation

Kidney taxation and exhaustion (failure) are related to high blood pressure (hypertension), diabetes and heart conditions.

Those complications **affect over 80% of the population** in the USA, UK and UAE at some point in their lives, often toward the end of life and chronically.

More than 1 in 7 adults in the United States suffer from Chronic Kidney Disease, according to the US Center for Disease Control (USCDC). That number is sharply rising due to Long COVID and mRNA vaccine-related injuries.

The (Only) Current Solutions

There are currently only two treatments for kidney failure: dialysis and organ transplant.

Every day more than 360 people begin dialysis for kidney failure in the United States. It's administered in-clinic 2-4 times a week. The patient must continue dialysis for the remainder of his/her life, unless a kidney transplant occurs.

25,000+ people receive kidney transplants each year. Within the first year after transplant surgery, 10-15% of kidneys can be rejected.

Total rejection rates of kidney transplants (meaning organ failure) are up to 69%.

Our Effective & Empathetic Solution

Our service is :

- The only proven* protocol available to reverse Chronic Kidney Disease (CKD)
- Developed by medical doctors and certified therapists
- Shows efficacy from the first and second week

*To date, we have two and twenty case studies of complete CKD Stages 3+ reversal yielding 100% success rates

For reasons of ethics and feasibility, we have not conducted an interventional study. This could affect our abilities to make claims to cure and treat under CAP Code §12 and FDA regulation. Hence useage of the word “protocol” or “therapy” rather than “treatment”.

The 6-Part Protocol

The protocol for reversing chronic kidney disease administers six types of medicines:

1. Frequency Medicine device, electrodes, laptop and headset/headphones
2. Vials of distilled, purified water to be structured with the frequency emission device and used homoeopathically
3. Herbal supplements
4. Stem cell injections*
5. Blood and urine home test kits
6. Nutritional consultation for diet and lifestyle changes

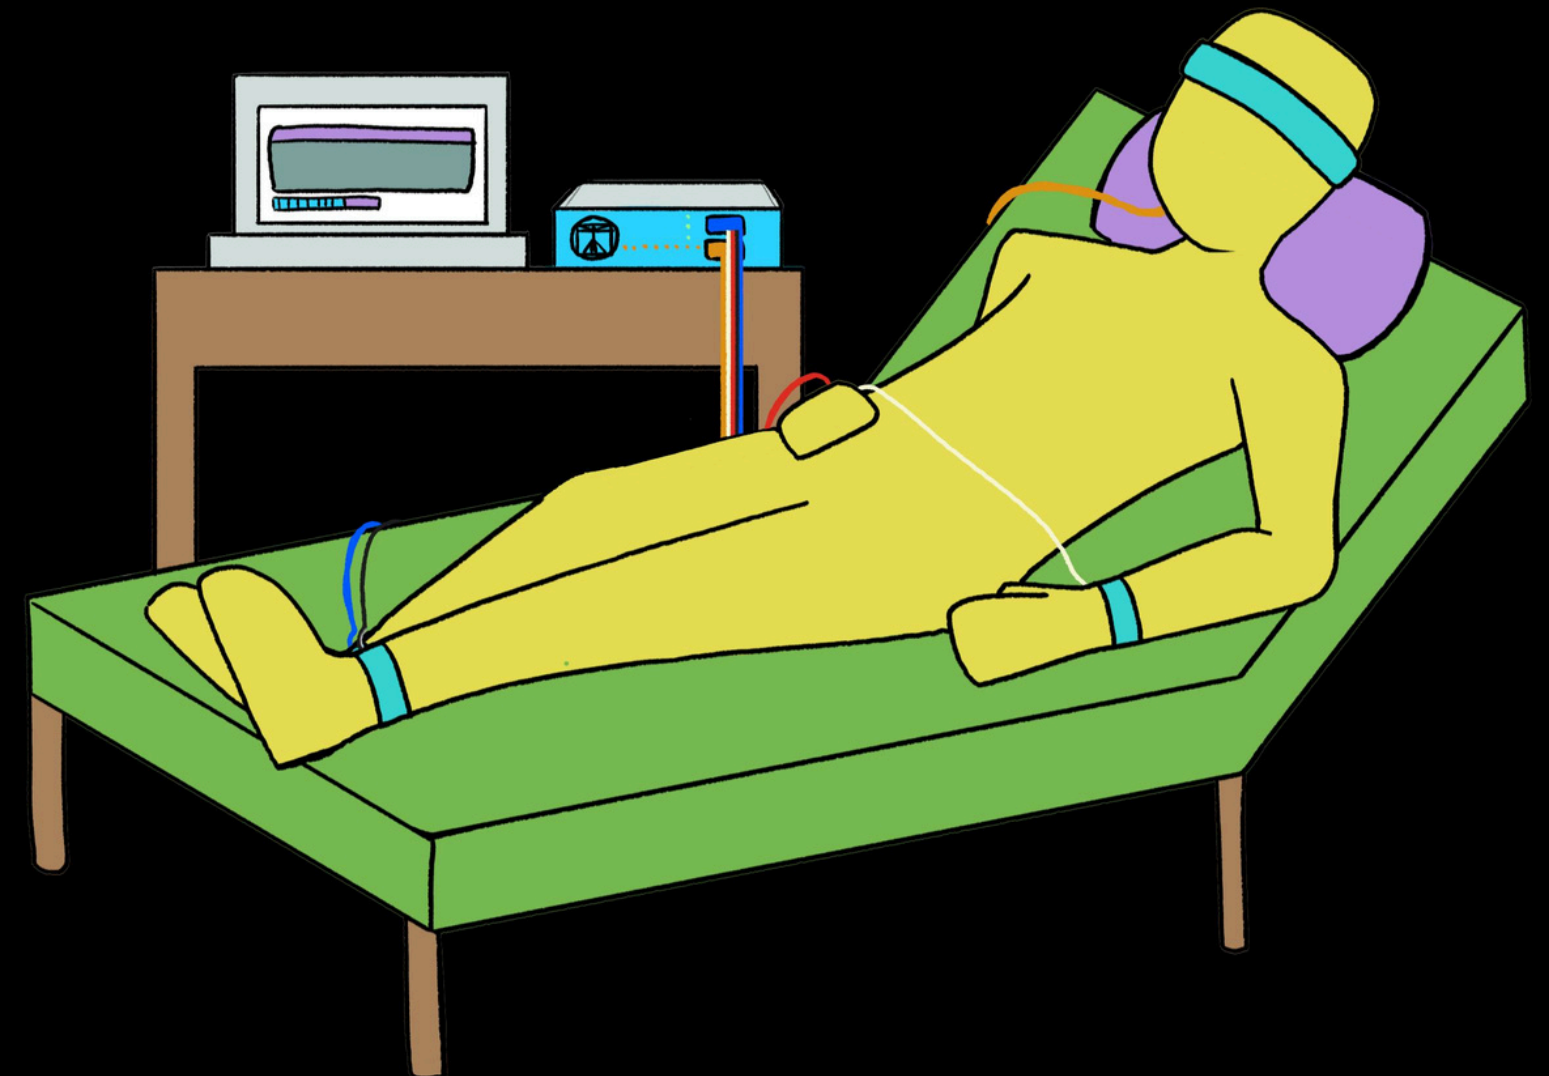

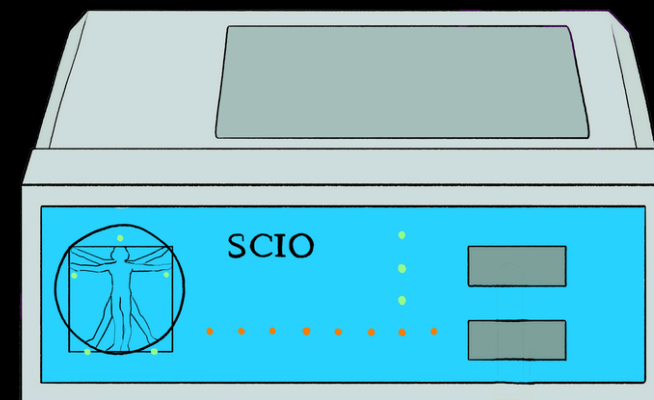

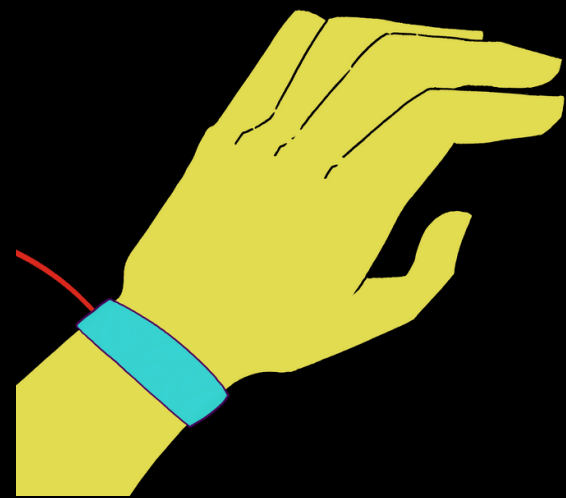

All medical supplies are shipped directly to the patient's home, including educational materials. The team of doctors, nurses, therapists and nutritionists all practice online consultation.

*Currently in India only; requires prescription and in-hospital administration in the UK

The Frequency Medicine Instruments

Electrodes are placed on the patient's ankles, wrists and forehead. These are connected to the device that reads and emits frequencies.

The device is controlled by highly specialised software. Therapists remotely control the computer through TeamViewer or AnyDesk.

Extremely Scalable

After piloting the world's first home rental programme for Frequency Medicine treatments in the UK between 2021-23, our services have been adapted to maximise both cost efficiency and convenience.

The languages we currently provide service in are: English, Spanish, German, French, and Italian.

Automation & AI

AI chatbots remind patients to submit blood and urine samples on time, and document the results in the patient's electronic medical records.

Telehealth

From the initial consultation with medical staff to remotely controlling the computer for each session, all service is rendered exclusively online.

Fully Compliant

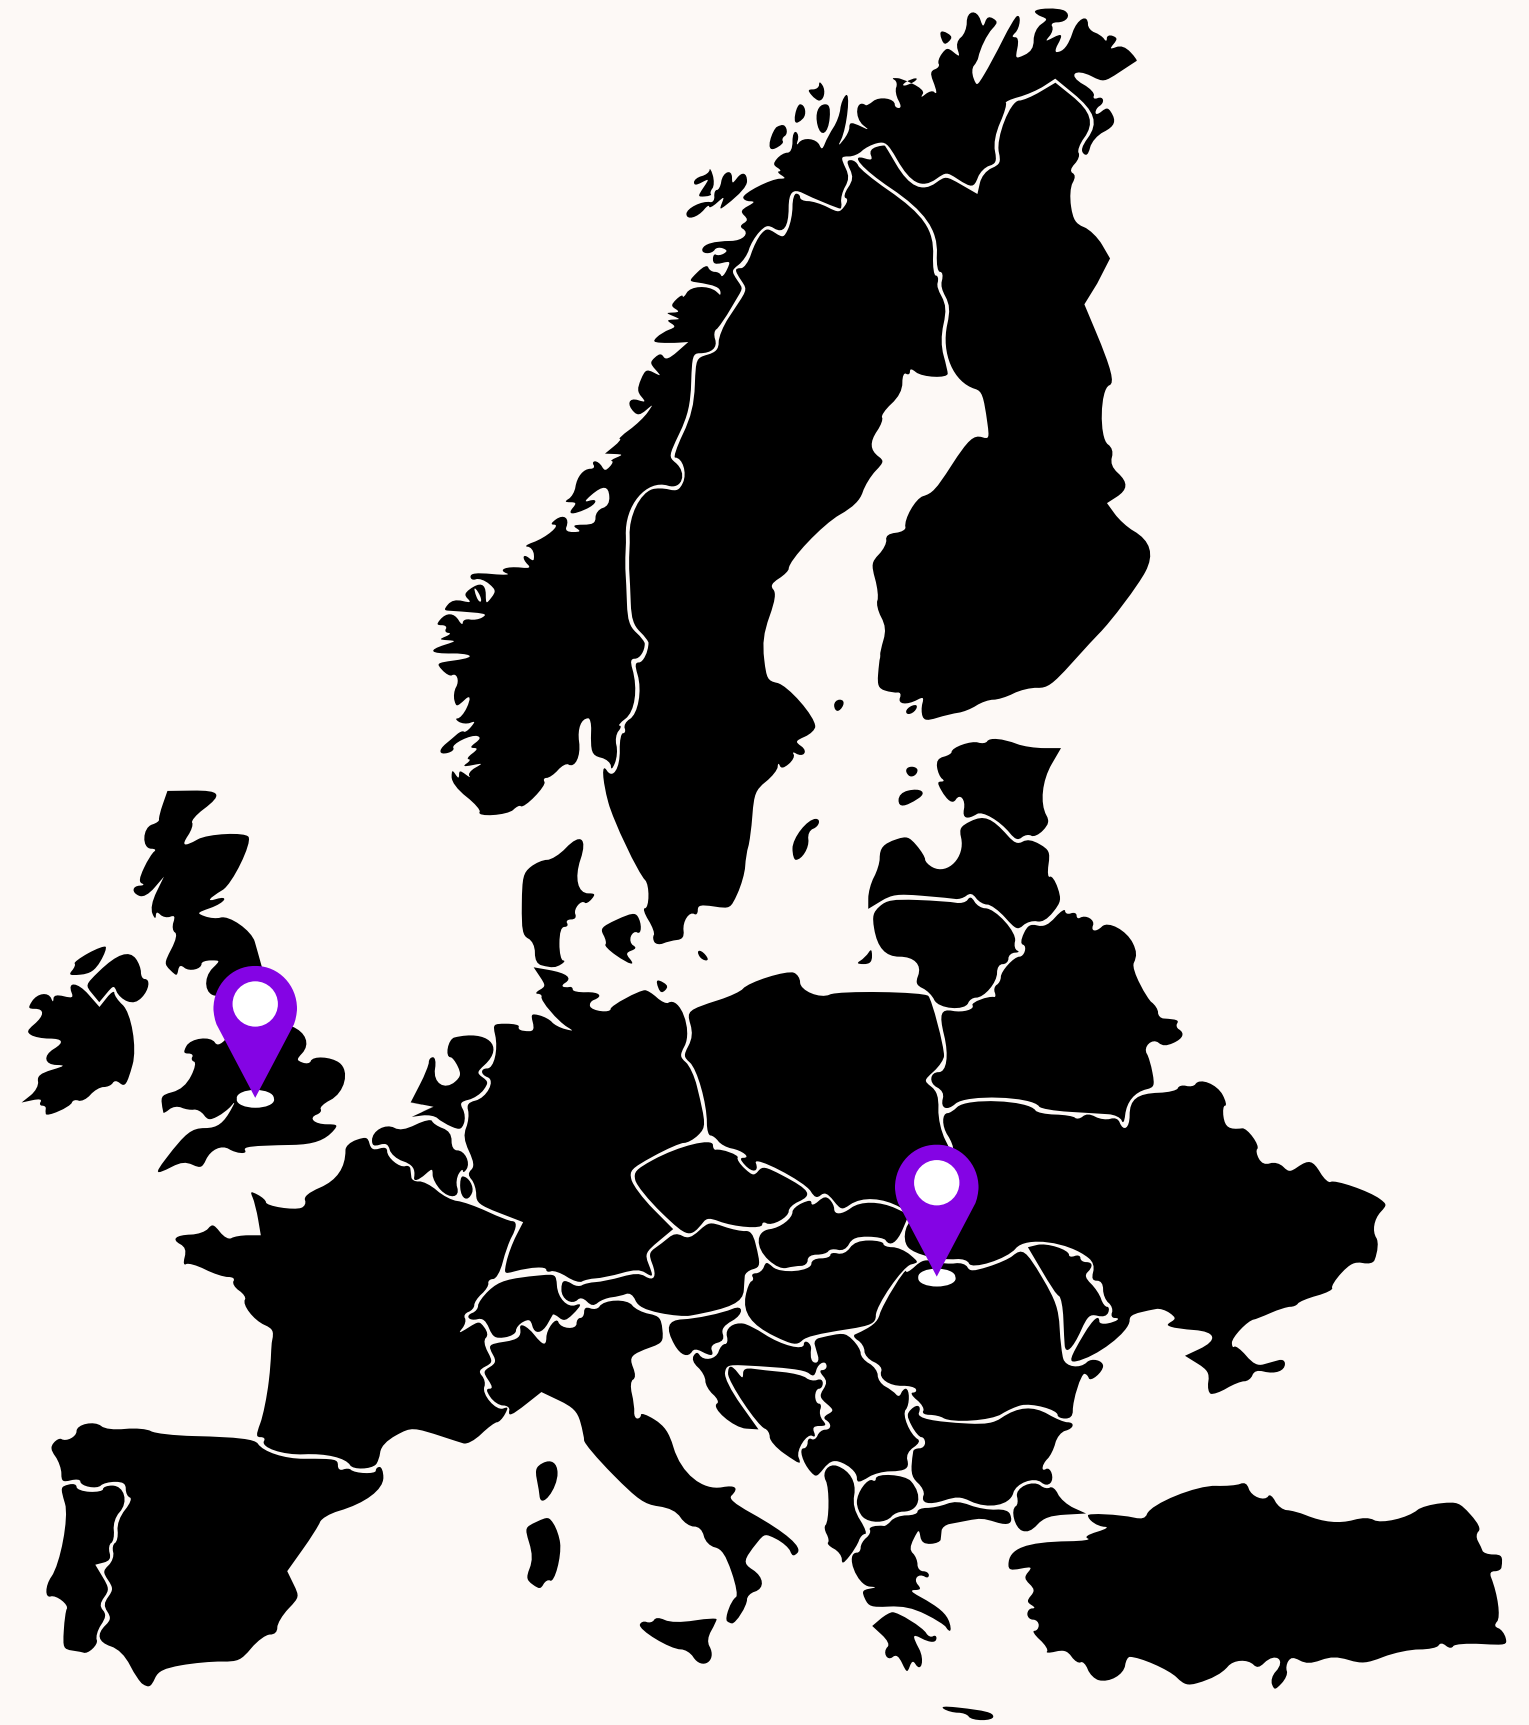

The Frequency Medicine hardware is FDA cleared and UKCA / CE marked. Our proprietary software controls the device in novel ways, adapting emissions in real-time due to patients' EEG and ECG reactions.

Our Hubs

We currently ship from:

- Bristol, England
- Satu Mare, Romania

We ship internationally to every country and territory across the planet.

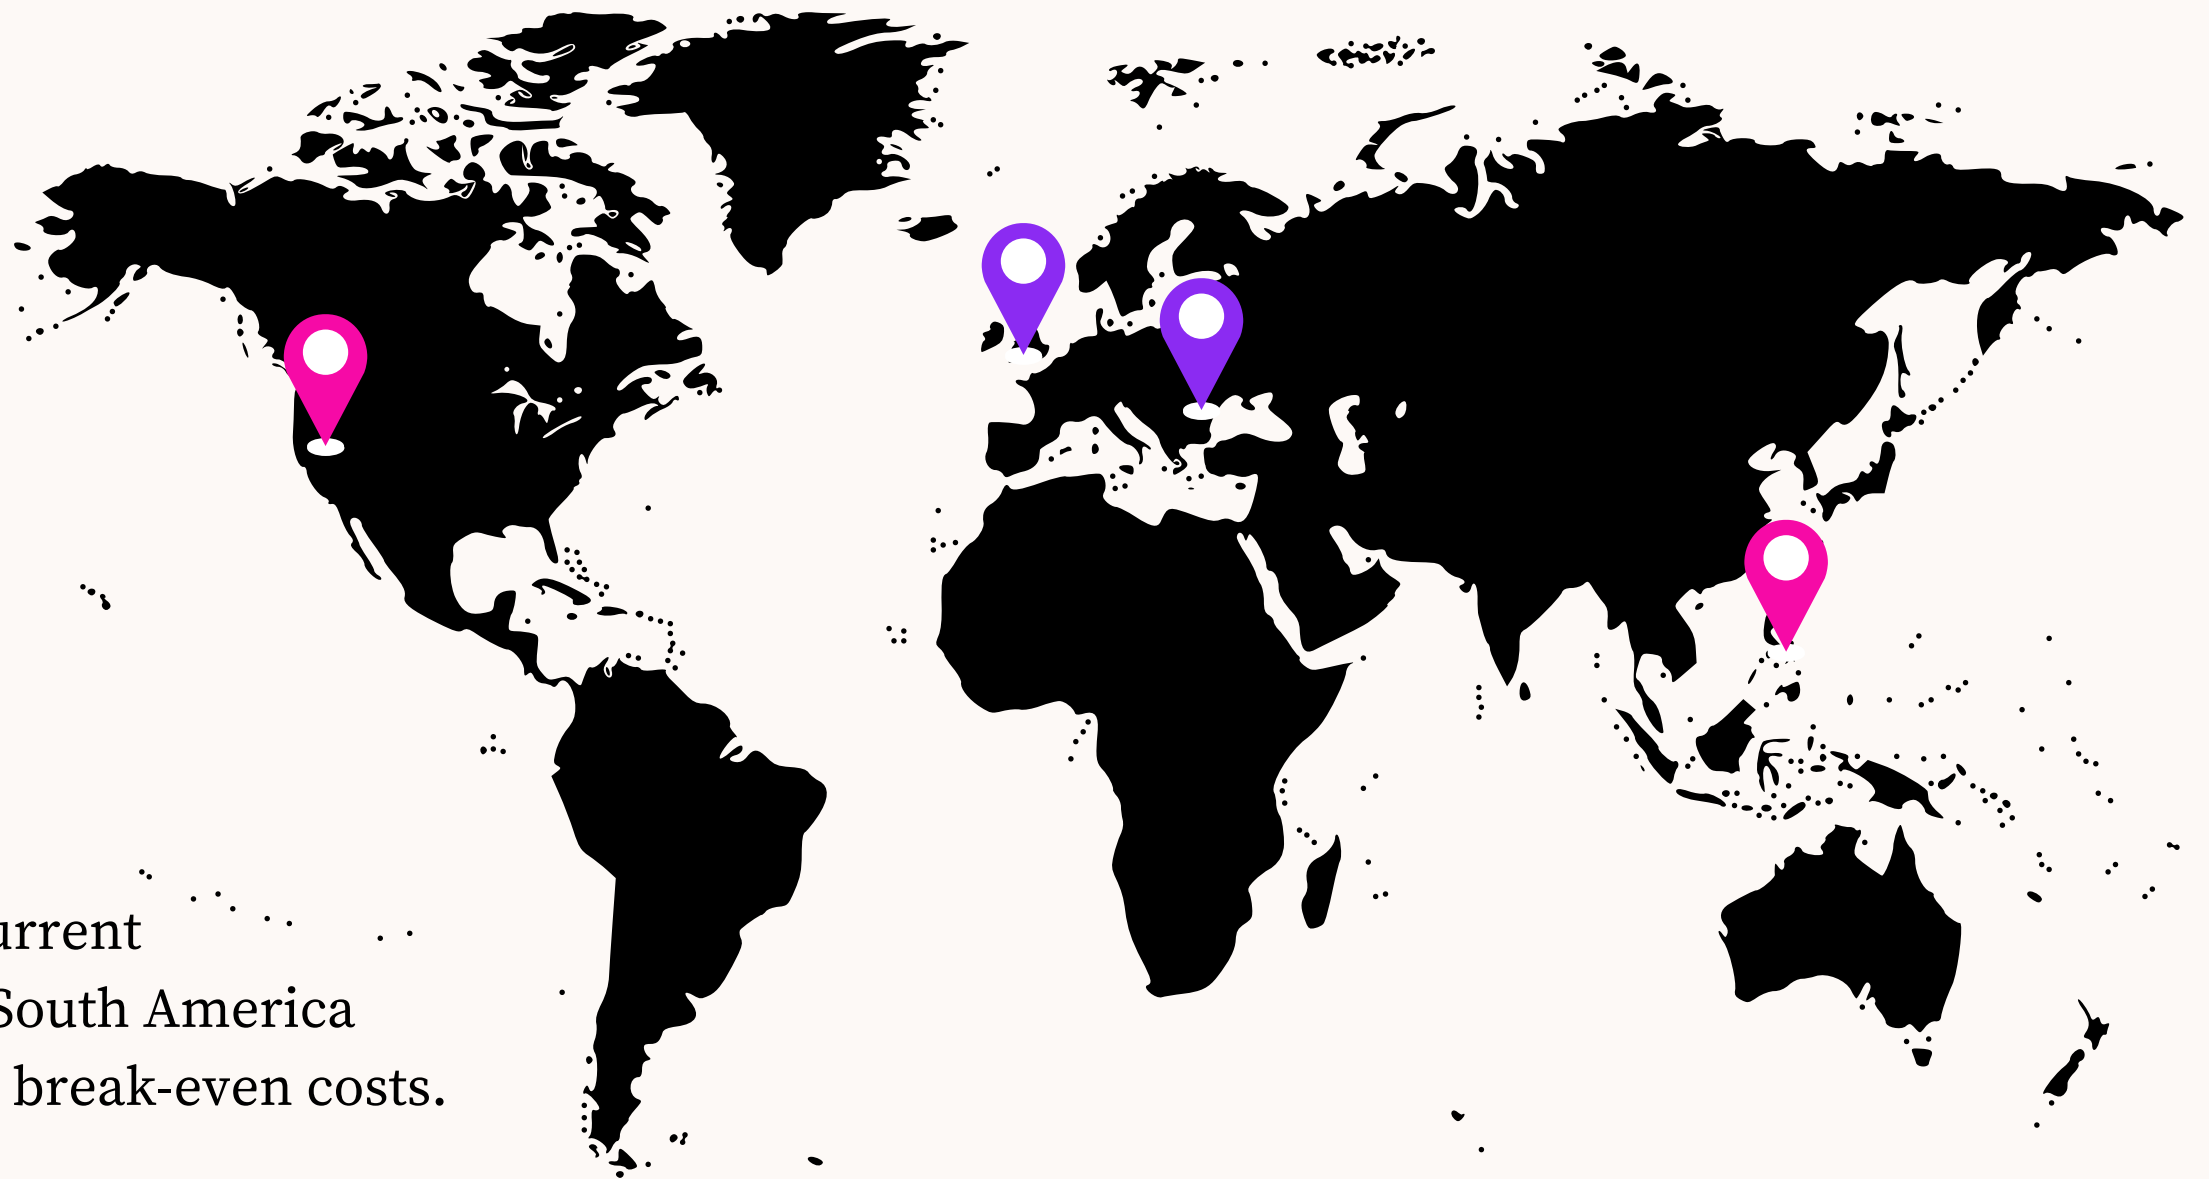

Planned Expansion

Although we already ship worldwide, opening distribution centres and contracting healthcare professionals in strategic areas will ensure our care can be expanded globally with consultations and care taking place 24/7.

Markets that are eager to adopt our unique holistic treatments include:

- Japan
- South Korea
- Middle East
- China

Profitable markets are prioritised only due to current growth being self-funded. Sub-Saharan Africa, South America and India can be easily serviced at approximate break-even costs.

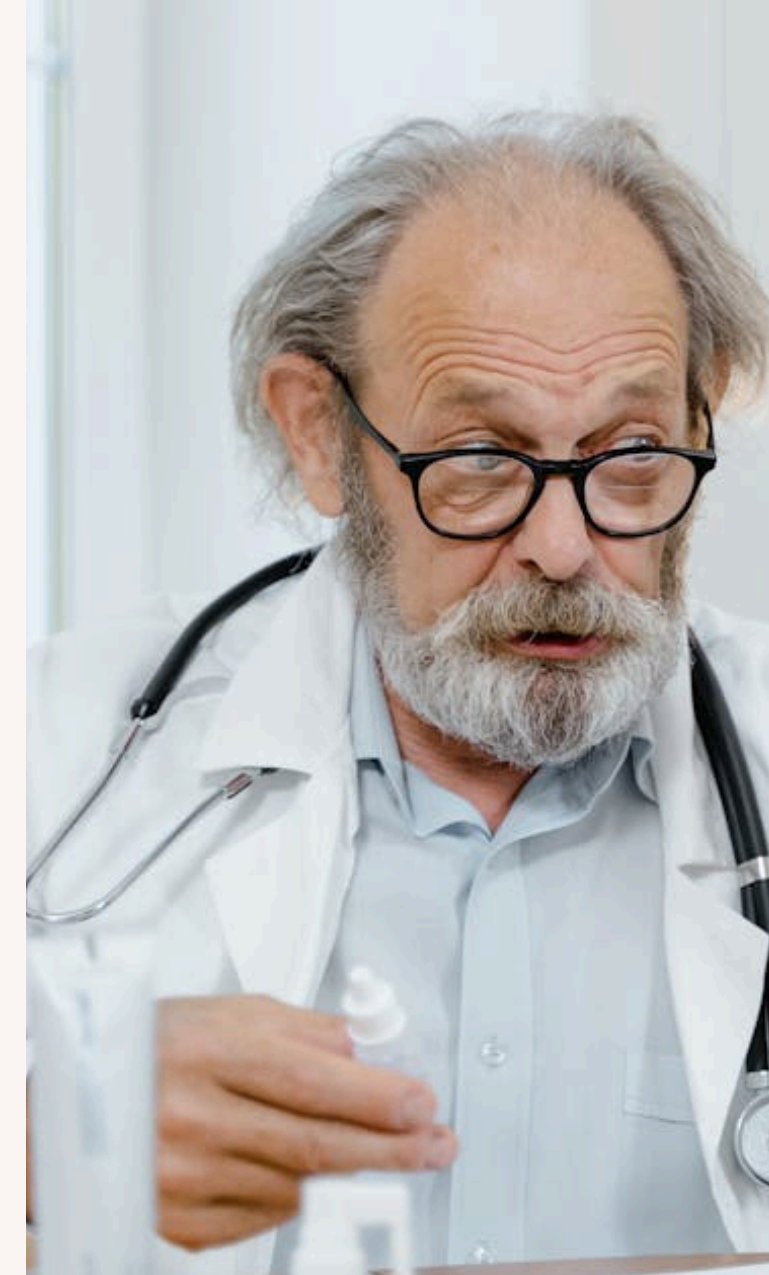

Meet the Core Team

Our team of experts come together online to provide excellent care for each patient, from initial consultation to monitoring and follow-up treatments.

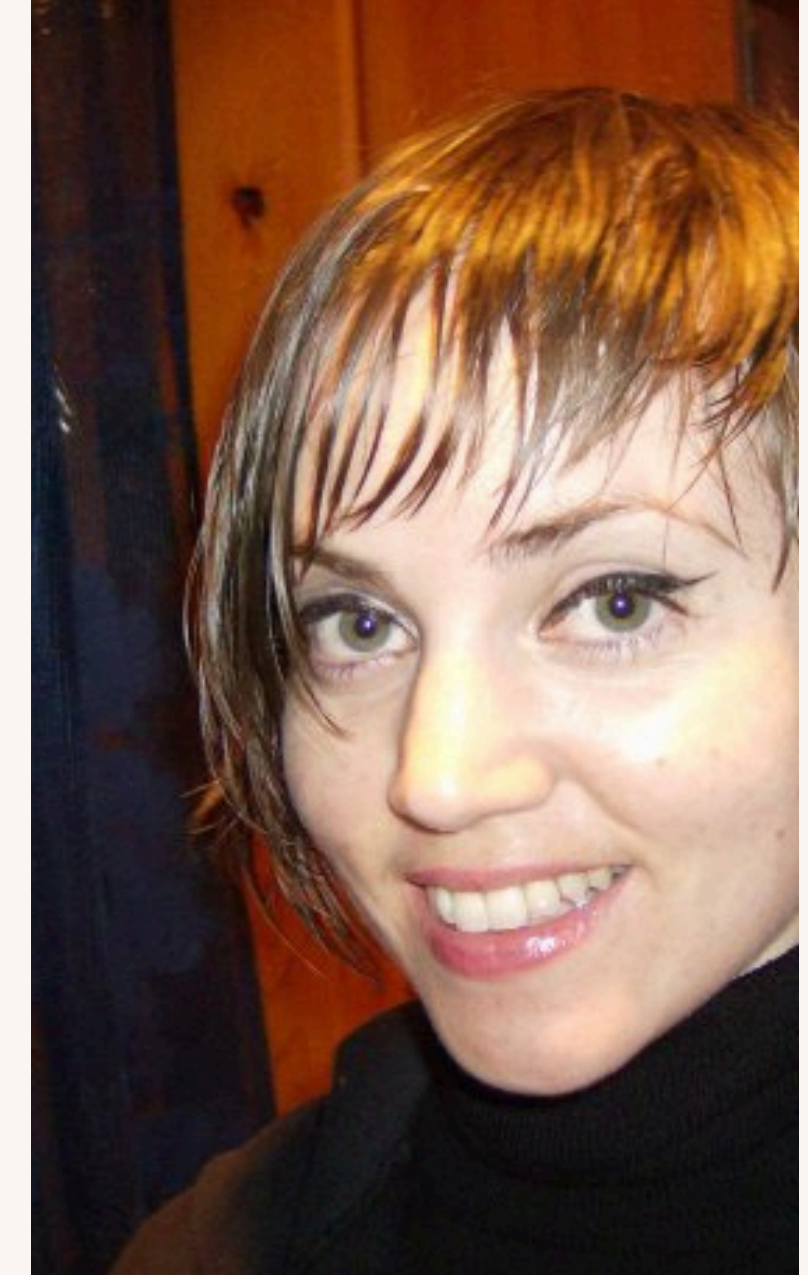

Pravin Patel
Medical Doctor

Based in **India** after 35 years
practising in USA

Salvatore LoCurto
Medical Doctor

Based in **Spain** after 38 years
practising in Italy

Alison Newkirk
Registered Nurse

Based in **California** with 15
years clinical practise

Meet the Core Team

Our unique approach to online and home-based healthcare ensures that patients and their carers do not endure added stress in travelling to and from clinic for treatments.

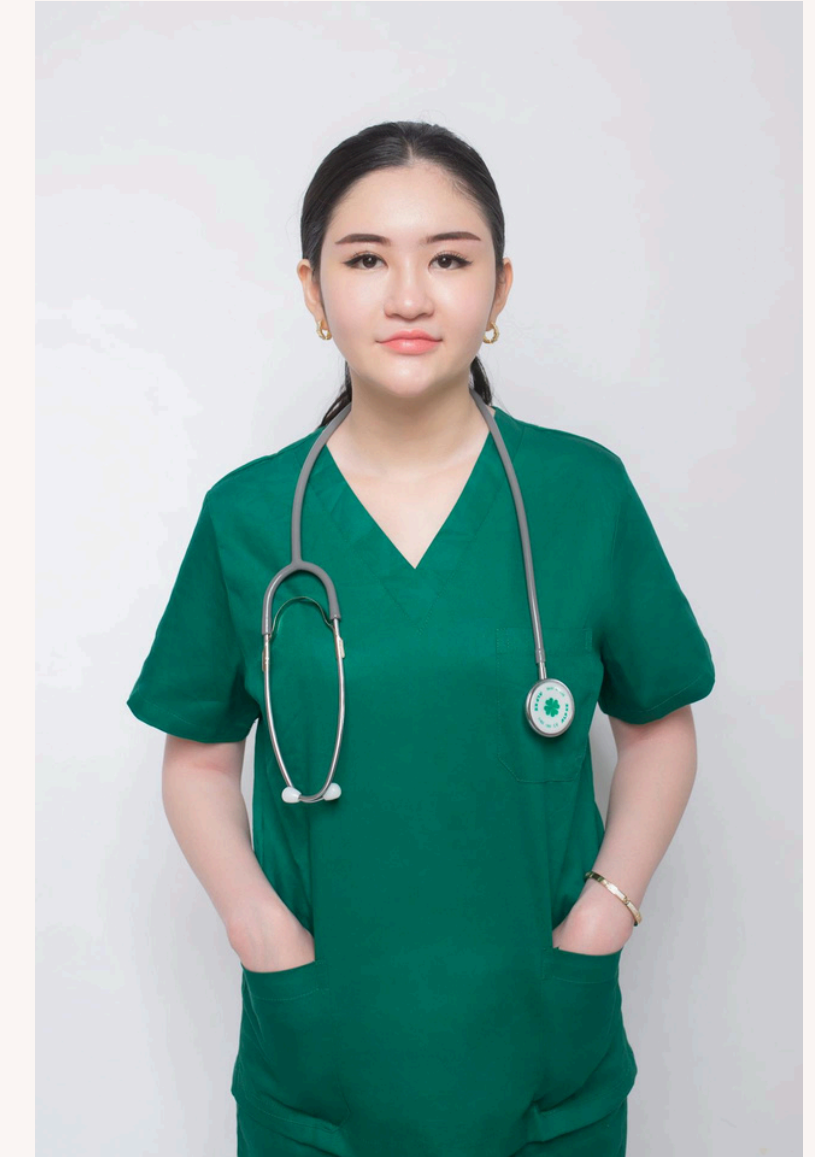

Denis Cesano
Therapist

Based in **the Democratic Republic of Congo** after 15 years practising in S. Africa

Linda LoCurto
Therapist

Based in **Mexico** after completing training under Kasey Naví Phifer in 2019

Janelle Josol
Registered Nurse

Based in **the Philippines** with 11 year clinical experience

Namaste.

I grew up in a small mining town on the edge of the world's largest freshwater lake. It imprinted in my soul a constant reminder of limitlessness.

I dropped out of university at age 19, turning down a scholarship to study music theory. I then moved to Germany and became fluent in the language within 18 months, later completing a B.A. in International Business.

For the past 15+ years I have been honoured to serve patients in-clinic and in home visits.

Now it is time to expand the reach of our charity in order to serve more patients globally, thanks to your contribution.

Kasey Naví Phifer
Director & Founder
